

BANKERS TO CONFER WITH MCADOO

From 59 Cities of Agricultural Regions of the South, Middle West and Pacific Coast

INVITED TO COME TO WASHINGTON

Treasury Department Will Secure First Hand Information From Districts Where \$50,000,000 of Government Funds is to be Distributed to Move the Crops—First Deposits Before the End of August

Washington, Aug. 4.—Representative bankers of 59 large cities in the agricultural regions of the south, middle west and Pacific coast were invited by Secretary McAdoo today to come to Washington to confer with the treasury department regarding the distribution of the \$50,000,000 of government funds about to be deposited in the national banks of those sections to facilitate the marketing and movement of the crops.

This unprecedented step, which will call to Washington bankers from the centers that will finance the handling of the great crops soon to be harvested, is designed to give the secretary first hand information and advice as to the specific and relative needs of each of the farming districts. It has been tentatively decided to place the deposits in the 59 cities to be represented at the conference.

Invitations today were sent to the presidents of the clearing house associations in each of the cities asking them to send representatives of committees to Washington to discuss arrangements for depositing the big sum. Treasury officials declared that the entire \$50,000,000 which has been offered will be deposited if the situation demands it. It was explained that care would be taken to prevent any undue inflation of the circulation volume of money and that the government would deposit only what was needed to assist moving the crops with the stipulation that it must be returned to the treasury as soon as that need shall have passed. At the conference with the bankers Secretary McAdoo will discuss the amount needed and the dates to be named for its gradual return of the money to the government. The treasury department expects to begin making the deposits before the close of August and gradually to feed the money into the selected centers as the demands grow through the crop-moving period.

Washington, Aug. 4.—The organization of a Catholic Women's League that proposes to counteract the radical tendencies of the women's movement including their demand for the use of the ballot, marked today's session of the German Roman Catholic Central Verein, which is holding its convention here.

"The feminist movement," said Mrs. Joseph Frey, the president, "is being promoted by women whose views are decidedly pagan. If the Christian family were to realize the Christian family would cease to exist and woman's condition would lapse into paganism."

"While the Catholic church has made no pronouncement on the matter of woman suffrage, the Catholic philosophy of life is opposed to it. However, we are not centering our activities in opposition to woman suffrage, but rather in a well formed plan for the future. The present unrest has resulted in the enfranchisement of woman in several states. These women would exert an evil influence by means of the ballot if a conservative party of women was not in the field to counteract their influence."

RIOTING HOP PICKERS QUIET IN CALIFORNIA.

Six Companies of Militia Encamped on the School Grounds.

Wheatland, Cal., Aug. 4.—With six companies of militia camped in the school grounds and the hop pickers encamped on the Durst Brothers ranch reduced to a few hundred persons, there was little indication here tonight of the rioting which brought death last evening to four men, among them District Attorney E. T. Maxwell.

Every train today carried out a full load of hop pickers from the force of over two thousand which yesterday occupied the wheatland and brush lands which formed the harvesters' camp. Only fifty pickers appeared for work this afternoon, and the ranch owners and Adjutant General Forbes, personal representative of Governor Johnson on the scene, were not inclined to anticipate further trouble.

Rumors were rife today of various parties of industrial workers of the World, said to be marching to the scene. No foundation for these reports could be discovered, and General Forbes said tonight the soldiers probably would be withdrawn tomorrow. The feature today was the total lack of ill-feeling toward guardsmen displayed by the hop pickers.

"We shall continue to demur," replied Senator Gallinger, "until we have made a record that perhaps may aid the people in understanding the situation when the effect of this bill is felt."

Senator Meyers of Montana in a lengthy analysis of the wool schedule declared that the people of his part of the west favored free raw wool and that a century of protection had failed utterly to aid the wool industry of this country. Minnesota Man to Mexico

EX-GOV. JOHN LIND SENT, STARTING AT ONCE

NOT AS AMBASSADOR

Is Personal Representative of President Wilson—Ambassador Wilson's Resignation Has Been Accepted.

Washington, Aug. 4.—President Wilson today took the first step in the policy through which he proposes to deal with the Mexican situation. He formally accepted the resignation of Ambassador Henry Lane Wilson, to take effect on October 14, and sent to Mexico City as his personal representative—but not accredited to the Huerta government—former Governor or John Lind, of Minnesota, a lifelong friend of Secretary Bryan. The understanding is that when a stable government is established in Mexico Mr. Lind will be formally named as ambassador.

President Wilson and Secretary Bryan had frequent conferences during the day. Ambassador Wilson had a long talk with Mr. Bryan, and Chairman Bacon of the senate foreign relations committee, discussed the situation with the president at the White House. But, except for the announcement of Mr. Lind's mission, no explanation for the policy to be pursued by the American government was forthcoming. The statement from Secretary Bryan read:

Adviser to the Embassy.

"Ex-Governor John Lind of Minnesota has been sent to Mexico as the personal representative of the president in the present situation. When the president is ready to communicate with the Mexican authorities as to the restoration of peace he will make public his view. Gov. and Mrs. Lind departed for Mexico tonight by rail to proceed via New Orleans for Galveston."

It became known that a further announcement would be made by President Wilson in a few days, upon the arrival of Mr. Lind in Mexico City.

Watching Mexican Leaders.

It is said the president is observing with keen interest the efforts of leading Mexicans to bring about peace and order in this country. These efforts are apparently proving futile. That Mr. Lind will be empowered to explain to all inquiries the unalterable opposition of the United States to the recognition of Huerta's administration is expected to be a factor which may assist the situation. Upon Mexican leaders have taken it upon themselves to try to persuade Huerta to retire in favor of another provisional executive, acceptable to all factions.

Meanwhile arms and munitions of war from the United States will continue to be delivered to the two warring forces and unless it is apparent that the internal efforts to bring about peace have failed the United States will not offer it services as a mediator. Mr. Lind will undoubtedly act in that capacity when the time comes.

Hops of Peace Programmes.

Declarations from both Huerta and Carranza have been made in the press rejecting mediation proposals, but administration officials realize that both sides fear they may be showing weakness in the acceptance of such a proposal. The administration is expected to be friendly to mediation would prove ineffective. Officials here hope that the effort to put an end to bloodshed and destruction of property and to public opinion in Mexico and unite the factions on a peace programme.

While officials of the administration here look with disfavor upon the process of armed revolution to overthrow constituted governments in Latin-America, there is a distinct feeling of sympathy manifest toward the liberal movement in Central America, of which Madero's administration was the beginning in Mexico. Arguments, therefore, that it was necessary to have in Mexico the iron hand of Diaz, which might be expected in Huerta, failed to make an impression on government officials here, who believe that the Latin-American governments cannot be expected to tremble at civil tyranny or military dictators.
